Salus Aviation and StandardAero Form Strategic Agreement to Enhance Helicopter Repair Services

Salus Aviation is excited to announce a new agreement with StandardAero, an approved Safran Engine and Airbus Dynamic Components repair station in North America, aimed at expanding the engine, module, and dynamic components repair pool. This agreement is set to significantly improve turnaround times for core inspections, meeting the growing demands of the helicopter sector.

This agreement represents a major initiative in which two innovative companies join forces to enhance operational efficiency and streamline repair processes. By working together, StandardAero and Salus Aviation will create a more transparent workflow, ensuring faster service delivery to clients across North and South America.

Salus Aviation has seen substantial growth in recent years, further solidifying its capabilities with a fully equipped MRO facility. The facility offers comprehensive services, including Maintenance, Avionics, and Paint, enabling Salus to better serve its customers and meet their diverse needs.

“Our goal is to transform transactional interactions into collaborative partnerships that drive value for the entire industry,” said Rafael Graham, President & Executive General Manager Americas, at Salus Aviation. “By collaborating with OEMs and vendors, we are committed to supporting the AOG EMS sector with readily available parts and exchange solutions, enhancing our service offerings.”

This strategic collaboration between Salus Aviation and StandardAero not only bolsters their service capabilities but also positions them to respond effectively to the evolving requirements of the helicopter industry.

Salus Aviation is an industry-leading helicopter and fixed-wing aviation company, specializing in aircraft sales, leasing, maintenance, component and engine overhaul, blade repair, avionics, design and manufacturing, parts supply, aircraft repainting, and reconfigurations. With operations in New Zealand, the USA, and South Africa, Salus Aviation is positioned as a global leader in the aviation industry. Salus Aviation’s comprehensive range of capabilities, in-house expertise, world-class technology, and certifications distinguish it within the market. END
