

Martin-Baker Delivers 3,000th Rotating & Traversing Crashworthy Seat

Johnstown, PA – March 2025 - Martin-Baker, the world leader in ejection and crashworthy seats, proudly announces the delivery of its 3,000th Rotating & Traversing Crashworthy Seat. This milestone highlights the company's commitment to safety, innovation, and excellence in aircraft seating solutions.

Designed for advanced rotary-wing platforms, the crashworthy seat provides enhanced survivability, adaptability, and comfort for aircrew operating in demanding environments. Martin-Baker's continued investment in research and development ensures cutting-edge solutions that meet the evolving needs of modern aviation.

"We are incredibly proud to reach this landmark," said Matt Johnson, General Manager at Martin-Baker America. "This achievement underscores our dedication to aircrew safety and the trust our customers place in our technology."

Martin-Baker has been at the forefront of safety-critical seating solutions, protecting thousands of aircrew worldwide. The delivery of the 3,000th Rotating & Traversing Crashworthy Seat reaffirms its position as an industry leader in aviation safety.

Over the past fifteen years, Martin-Baker has delivered over 22,000 Troop and Gunner and Multi-Functional Operator seats for the UH-60M Black Hawk, solidifying its position as the leading supplier in the crashworthy seating market by sales volume.

Visit our booth, #7555, at Verticon to explore Martin-Baker's crashworthy seating solutions!
