

MEDIA RELEASE EMBARGOED UNTIL MARCH 11, 2025

PJ Helicopters and Winco Powerline Services Select Cirro by AirSuite as Their Flight Operations and Safety Management System

March 11, 2025, Dallas, TX – PJ Helicopters, a Quanta Services Company and a leader in precision helicopter lift services, and Winco Powerline Services, a Quanta Services Company, have chosen Cirro by AirSuite as their comprehensive Flight Operations and Safety Management System (SMS). The announcement comes on the second day of the VAI Verticon Conference.

Greg Stine, Director of Safety, Quanta Aviation Services, LLC, says “Quanta Aviation Services Group, to include PJ Helicopters and Winco Powerline Services, is happy to announce adding Cirro by AirSuite’s cloud-based software to its toolbox to support the many aspects of utility and firefighting operations — including flight managing, planning, training, tracking, company library, and SMS. Cirro analyzes many processes required of front-line operations as teams carry out their daily duties while providing visibility to operational leaders.”

PJ Helicopters operates a fleet of 44 aircraft, all onboarding Cirro and is leveraging the platform’s unlimited user capabilities to expand to include their ground fleet tracking, crew certification tracking, and a company-wide adoption of Cirro’s SMS.

“Integrating operations and safety within one platform was the deciding factor for us,” says Seth Gunsauls, President of PJ Helicopters. “We take immense pride in our commitment to safety and operational excellence, and Cirro provides us with a user-friendly, scalable platform, ensuring that we can continue to deliver the highest level of service to our customers.”

Winco Powerline Services also onboarded a fleet of nine aircraft with a full subscription to Cirro’s premium plan.

“We maintain an uncompromising focus on safety and efficiency,” says Trever Walker, President of Winco Powerline Services. “Cirro’s tools will streamline our operations and allow us to manage the fleet with increased digital oversight, providing another critical layer of safety.”

Dave McCammon, VP and Director of Operations at PJ Helicopters, says Cirro stood out from other solutions on the market: “With Cirro, we are taking a significant step forward in digital transformation. The features that impressed us include their unlimited number of users, cross platform compatibility, digital flight reports, crew certification tracking, and integrated Safety Management System.”

Cirro by AirSuite integrates with other popular aviation software including maintenance tracking systems, learning management systems, satellite tracking systems and fatigue risk management systems. It is designed to provide an all-in-one solution with a focus on regulatory reporting and compliance.

“We are honoured to welcome PJ Helicopters and Winco Powerline Services to the Cirro platform,” said Mike Kleywegt, CEO of AirSuite. “Their adoption of Cirro underscores the importance of integrating operations and safety into a single, unified system. We look forward to supporting their teams.”
