

XP Services to showcase Aviation Solutions at VERTICON 2025

DALLAS, March 10, 2025 – XP Services, a leader in aviation services, announced today its participation in VERTICON 2025, the world’s largest vertical aviation trade show. The event will take place March 10-13 at the Kay Bailey Hutchison Convention Center in Dallas.

XP Services specializes in developmental flight testing, aircraft certification and modifications, serving military and commercial operators. At VERTICON, the company will showcase a UH-60L helicopter equipped with advanced systems, demonstrating customization options for UH-60A/L platforms. Featured systems include:

- Moog’s Genesys Avionics Suite and 4-axis autopilot
- XP WX radar dome
- XP EO/IR nose mount
- MX-15 EO/IR system
- LFT obstacle detection system
- Dillon M-134 Minigun
- Fulcrum Claw with podded GAU-19
- Moog DRL with Hellfire capability
- MSG EGMS with 7-shot 2.75-inch rockets
- XP MTS (motorcycle transport system)
- R4 SATCOM

This is not a deployment configuration but a demonstration of available options for the UH-60A/L platform.

“Our mission is to deliver efficient solutions for aviation challenges,” said Rodney Allison, president and CEO of XP Services. “We are committed to advancing aviation technology and training.”

XP Services will be at the **Moog Booth A1305** at VERTICON 2025.

About XP Services

Founded in 2008, XP Services provides flight testing, avionics modernization, aircraft maintenance and upgrades. Headquartered at Tullahoma Airport (KTHA) in Tennessee, the company employs experienced professionals with military and special operations backgrounds.
