#### FOR IMMEDIATE RELEASE

#### **Salus Aviation Launches New Aircraft Parts Search and Request-for-Quote Feature on Website**

Salus Aviation, a leading provider of aviation parts and services, is excited to announce the launch of a new feature on its website, making it easier than ever for customers to find and request quotes for over 28,000 aircraft parts.

With the new search functionality, customers can now easily browse an extensive inventory of high-quality aircraft parts from a wide range of manufacturers. The streamlined process allows users to search for specific parts, add to a cart and quickly submit a request for a personalised quote.

"We understand that sourcing the right aircraft parts quickly is crucial for our customers," said Philipp Antwerpen, Executive General Manager - MRO Services at Salus Aviation. "This new feature simplifies the enquiry process by providing customers with direct access to our comprehensive catalogue of over 28,000 parts. If the part they need isn't available, we're ready to source it for them through our extensive network of suppliers."

Key features of the new system include:

- **Advanced Search:** Find aircraft parts quickly with a user-friendly search tool that allows customers to filter results by part number, description, and more.
- **Request for Quote (RFQ):** Once the part is located, customers can submit a detailed request for a personalised quote, making the purchasing process easier.
- **Custom Sourcing:** If a part isn't available on the site, Salus Aviation's team can quickly source it from trusted suppliers, ensuring customers receive the parts they need when they need them.

Salus Aviation remains committed to providing the aviation industry with exceptional service and high-quality products. The new online feature is part of the company's ongoing effort to enhance customer experience and streamline the purchasing process for aircraft parts.

To explore the new features or submit a request for a quote, visit [www.salusaviation.com/parts](http://www.salusaviation.com/parts).

Salus Aviation is an industry-leading helicopter and fixed-wing aviation company, specializing in aircraft sales, leasing, maintenance, component and engine overhaul, blade repair, avionics, design and manufacturing, parts supply, aircraft repainting, and reconfigurations. With operations in New Zealand, the USA, and South Africa, Salus Aviation is positioned as a global leader in the aviation industry. Salus Aviation's comprehensive range of capabilities, in-house expertise, world-class technology, and certifications distinguish it within the market.
