**FOR IMMEDIATE RELEASE**

## **Aero Asset Reports 2025 Twin-Engine Helicopter Sales Sink to Five-Year Low, with APAC Defying Downturn**

*Report notes retail sales reach five-year low, steady supply for sale, firm median pricing, and bullish growth in Asia-Pacific.*

**TORONTO, Canada, September 15, 2025** – Aero Asset, a global helicopter sales and market intelligence firm, released its 2025 Half Year Heli Market Trends Twin-Engine edition. Powered by proprietary market insight, this report delivers a comprehensive analysis of the global preowned twin-engine helicopter market, providing insight for industry stakeholders.

The report tracks activity across weight classes, configurations, regions, and highlights trends in sales, supply, pricing and liquidity. For the first half of the year, the data revealed that twin-engine

sales activity dropped sharply: only 49 twin-engine helicopters sold to retail buyers between January and June — a 33% drop from 2024 and the weakest performance in five years.

"Global sales hit a five-year low, but supply held steady — and Asia-Pacific bucked the downturn with bullish momentum ," said Valerie Pereira, Vice President of Market Research.

**Pricing**

Supply of twin-engine helicopters for sale was stable year over year (YOY) with a drop of 3%. “Supply remains relatively low, only 23% higher than its lowest point in the last five years”, said Valerie Pereira. Absorption rate rose to 22 months of supply at current trade levels. Median transaction price (MTP) climbed 7% YOY, with light and medium twins up 10% YOY, and heavy twins reaching a five-year high.

### **Weight Class Performance**

The declining retail sales trend was evident across all weight classes. Light twin-engine sales fell 37% YOY, with supply steady. Medium twin retail sales dropped to a five-year low, and supply hit its lowest point in five years. Heavy twin sales fell to their lowest level in five years, supply surged 43% YOY.

### **Regional Trends**

Market activity shifted geographically in the last six months. Supply for sale was concentrated in Europe (36%) and LATAM (26%), followed by North America (19%) and Asia-Pacific (APAC) (14%). By contrast, the North American market accounted for the largest share of transactions (39%) with APAC (25%) Europe (16%) and LATAM (14%). APAC posted the only YOY retail sales increase during the first half of 2025 (+71%), whereas sales in Europe declined 68%.

### **Liquidity**

The Airbus EC/H145 and Bell 429 markets performed best during the first six months of 2025. The Leonardo AW109S/SP and Sikorsky S92A markets were strong contenders, while the Airbus EC/H225 and EC/H155 markets continued to struggle with absorption rates exceeding three years.
