## **AlarisPro's UAS Fleet Management Platform joins USAIG's Performance Vector Unmanned Annual Benefits Program for Unmanned Aircraft Operators**

**New York, NY: (December 11, 2025)**...USAIG, one of the world's leading aviation-specific insurance providers, now includes support for AlarisPro's Fleet Management Software solutions within its Performance Vector Unmanned benefits program for policyholders that operate unmanned aircraft. Each UAS policyholder is eligible to request and receive a complimentary annual allocation of SafetyPoints, based on the policy's size and scope, which can be applied to offset costs with participating providers of unmanned aviation support services. AlarisPro's advanced aviation-grade platform for UAS fleet management, safety, and compliance is now a supported option in this program.

"As the unmanned aviation industry advances, operating fleets are getting larger, more diverse and more distributed, rivaling and often exceeding the enterprise management needs of manned aircraft operations," says Andrew Spiegel, S.V.P. and Head of Unmanned Aircraft Underwriting. He adds, "it's common for the number of aircraft and remote pilots in an unmanned operation to be considerably higher than a typical manned aircraft outfit, magnifying the challenges of sustaining operational oversight, safety management, and tracking of maintenance status and operator currency." Built by professionals with deep experience in manned and unmanned aviation, AlarisPro's platform unites flight, maintenance, safety, and component-level data into one secure, intuitive solution. With integrated modules for lifecycle tracking, pilot and crew management, maintenance planning and documentation, along with integrated Safety Management System and Flight Risk Assessment tools, AlarisPro supports operators pursuing scalable, compliant, and BVLOS-ready operations.

When a UAS policyholder opts to apply its annual USAIG Performance Vector Unmanned benefit toward AlarisPro, a unique coupon code is issued to the policyholder that enables them to register their SafetyPoints with AlarisPro and initiate a consultation to determine the scope and cost of services needed based on fleet composition and operational needs. From there, SafetyPoints function like a gift card to subsidize a portion of the operator's annual platform cost. Because Performance Vector Unmanned benefits refresh at each policy renewal, operators can continue applying their allocation year after year to maintain or expand their AlarisPro services.

"AlarisPro is proud to support USAIG policyholders with a solution designed to elevate safety, strengthen compliance, and enable scalable unmanned operations," said Anthony Pucciarella, Founder and CEO of AlarisPro. "As UAS missions grow in complexity and regulatory requirements evolve, operators need aviation-grade tools they can trust. This partnership helps ensure that more organizations have access to the data, insights, and operational discipline required to fly safely and confidently in an increasingly dynamic airspace."

To enroll in Performance Vector Unmanned, a policyholder representative simply needs to communicate the request to their aviation insurance broker or underwriter, who can trigger the enrollment. ### **About USAIG**

[United States Aircraft Insurance Group](http://usaig.com) (USAIG) provides a full spectrum of coverage options for owners, operators, manufacturers, and maintainers of corporate, private, and commercial aircraft. In 1928, our founders – World War I pilots and businessmen David Beebe and Reed Chambers – saw the need for an insurance company that truly understood aviation. We remain a world aviation insurance leader delivering innovative, custom-tailored insurance products and services, including Performance Vector and Performance Vector Unmanned safety programs and Performance Vector PLUS good experience returns. United States Aviation Underwriters, Inc. manages USAIG, maintaining the industry's largest network of underwriting and field claims offices. USAU's wholly owned subsidiary, Toronto-based Canadian Aviation Insurance Managers manages the Canadian Aircraft Insurance Group insurance pool. USAIG is a subsidiary of General Re Corporation, a Berkshire Hathaway company. Follow us on X, Facebook, LinkedIn & Instagram.

### **About AlarisPro**

[AlarisPro](http://alarispro.com) delivers the industry's most advanced, aviation-grade UAS operations and fleet management platform on the market, equipping operators, manufacturers, and maintenance professionals worldwide with critical safety and reliability data needed to reduce risk, ensure compliance, and optimize unmanned systems and subsystems. Designed by military aviators and civilian UAS experts, AlarisPro brings a systems-of-systems approach to analyzing UAS reliability. The platform uniquely manages the industry's only centralized repository of UAS component reliability data, empowering users to make data-driven decisions, maximize operational efficiency, and safely expand mission capabilities across the unmanned aviation ecosystem. AlarisPro is setting the standard for safe, scalable, and compliant UAS operations worldwide.
