## Next Generation Ops and Safety Management

Get a **Free Safety Management System (SMS)** with Any Cirro Plan

The screenshot displays the Cirro software interface with a navigation bar at the top containing buttons for 'Create a New Flight', 'Personal Iti', 'Report Hazard', and 'Report Occu'. Below the navigation bar is a grid of icons for various tools: Safety Management, Flight Reports, Flight Duty Times, Company Library, Flight Following, Weight & Balance, Field Gear Tracking, Maps & Charts, and Passenger Manifesting. Overlaid on the interface is a 'Safety Performance Trend Analysis' chart. The chart is a grouped bar chart showing 'Hazard' (dark blue) and 'Occurrence' (light blue) counts for January and February. In January, there are 3 hazards and 5 occurrences. In February, there are 4 hazards and 2 occurrences. To the right of the bar chart is a donut chart divided into four segments: Activity (dark red), Human Factors (red), Hazard (olive green), and Place (green).

Month	Hazard	Occurrence
Jan	3	5
Feb	4	2
