

WYVERN

**Safety That
Works in the
Real World**

www.wyvernlimited.com

Built for Real-World Operations

Helicopter and UAS operators face complex missions, tight margins, and high consequences.

WYVERN safety tools are designed to support how you actually operate — not how a manual says you should.

Why Operators Choose WYVERN

In an industry where margins are thin and consequences are high, leading operators choose WYVERN to move beyond basic compliance and into the realm of Safety Intelligence.

By partnering with us, you aren't just checking a box — you are gaining a dedicated safety advocate and a competitive advantage that tells brokers, corporations, and passengers that their safety is your highest strategic priority.

Our Services

SMS & Safety Tools

Practical safety tools that help helicopter and UAS operators identify risk, manage safety data, and support continuous improvement — without adding unnecessary complexity to daily operations.

Wingman Program

Structured safety frameworks that support professional standards in both manned and unmanned operations, designed to scale with mission complexity and operational growth.

Training & Leadership Development

Focused training and leadership programs that strengthen decision-making, human performance, and safety ownership in real-world operating environments.

Virtual Safety Officer

WYVERN's Virtual Safety Officer (VSO) Program provides expert support when in-house resources are limited. Tailored to your needs, it ensures effective Safety Management System (SMS) implementation, monitoring, and compliance with ICAO and CAA standards.

What Operators Tell Us

*We needed safety tools that
actually fit our operation —
not more paperwork.*

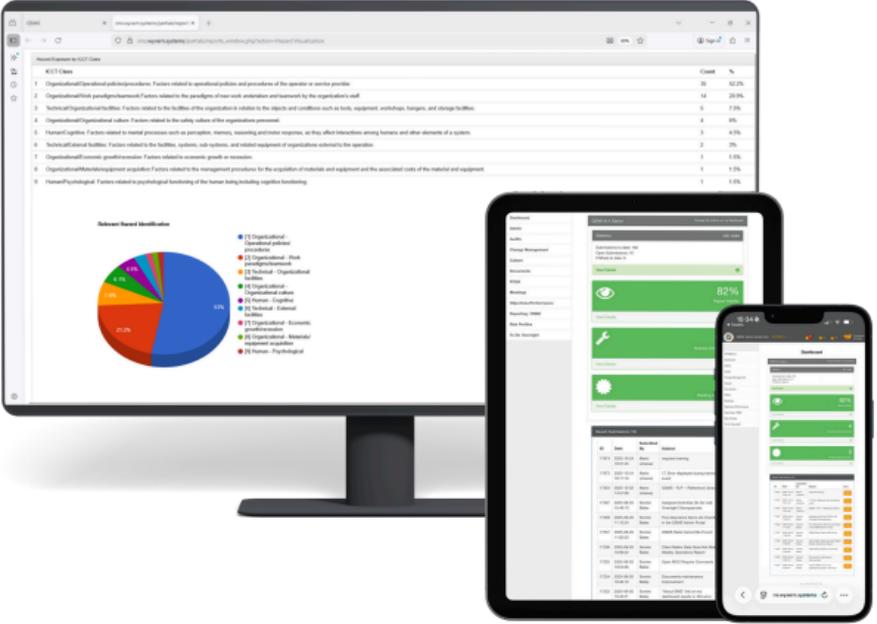

*WYVERN helped us simplify risk
management and focus on what
really matters.*

**Most safety breakdowns aren't
caused by lack of intent —
they're caused by systems that
don't fit the operation.**

WYVERN closes that gap.

**Risk management that actually
works.**

We strongly believe in providing exceptional support to our customers.

*Don't just meet the standard—set it.
Let's talk.*
