

Airble Partners with Maverick Helicopters

Canada's first Retail-Direct Marketplace Celebrates the Expansion of its Platform and Website Widget.

Vancouver, March 1st, 2026 – [Airble](#), Canada's pioneering retail-direct marketplace, announced the onboarding of its 70th air operator partner, marking a milestone in its mission to transform private air travel through seamless digital access. The partnership with [Maverick Helicopters](#) adds a combined fleet of 49 Airbus 130 and Sikorsky S-76 helicopters to the marketplace, offering personalized helicopter charters, exclusive empty leg deals, and unforgettable VIP experiences across California, Nevada, Arizona, and Hawaii.

“With this partnership, our guests will enjoy exclusive access to an extensive fleet of helicopters, each operated by experienced pilots and maintained by skilled professionals who ensure that every flight is an extraordinary VIP experience”, Airble founder Saeed Golzar explains. “Partnering with Airble allows us to reach a broader audience through a modern, digital-first platform,” adds Ben Villalobos, VP of Business Development at Maverick Helicopters. “We’re excited to offer travelers more flexible booking options and to showcase the premium service that has made Maverick Helicopters a trusted name in luxury vertical travel.”

Airble is a Canadian aviation technology company developing advanced software platforms for on-demand air mobility. Airble's mandate is to modernize and digitally transform the on-demand charter aviation, air tour, empty leg, and regional air mobility sectors through an integrated, real-time aviation marketplace supported by intelligent operational tools.

Airble provides a suite of products, including a B2C booking marketplace, a B2B operator management software, an algorithmic pricing engine, a multi-agent digital twin for fleet optimization, and an empty-leg monetization platform. The company partners with helicopter, seaplane, and fixed-wing operators to streamline dispatch workflows, expand public access to flexible air travel, and support a more sustainable and efficient aviation ecosystem. Airble has more than 70 air operator partners in Canada, the US, the EU, Argentina, Mexico, and Indonesia.

First Product (B2C Marketplace):

A fully automated retail-direct online platform that allows passengers to create, purchase and book a flight in real time, with the added benefit of instantly promoting empty legs created for the air operator. In addition to charters and empty legs, Airble also offers packages and tours using its operator's fleet.

Second Product (SaaS Model):

Booking widget for air operators:

- Embeds the same booking engine used on Airble directly onto your website for your clients to book your fleet.
- Listing fee applies, 0% commission.
- Membership is optional. If your organization chooses to implement a membership, we can configure pricing so your members see different rates than non-members.
