FOR IMMEDIATE RELEASE

Aviation Specialties Unlimited Recognizes E3 Early Adopters

(Atlanta, GA, March 11, 2026) – Aviation Specialties Unlimited (ASU), a leading provider of night vision solutions, took time on the trade show floor at the VAI Verticon Annual Convention in Atlanta to recognize early adopters of the E3 NVGs manufactured by ASU.

“We wanted to take time to recognize the companies that placed their faith and trust in us by adopting our new E3 NVGs early in the process,” said ASU Vice President of Sales and Marketing Dan Meyer. “With our new E3 platform, it was vital to have early adopters who use the products in the field that can give us crucial feedback. Their input and use of the E3 enable us to maintain the high level of excellence that our customers demand while implementing ideas for the future.”

ASU presented custom-made OWL awards to its early adopter customers, followed by an afternoon social. Early adopters included:

J.D. Pearson - **OSF Aviation Limited Liability Company**
Paul Julander - **PHI Health, LLC**
Thomas Dagnillo - **Construction Helicopters Inc**
Derek Spooner - **PJ Helicopters**
Jan Sobick - **HELI-FLIGHT JLR GmbH**
Mark Onorato - **Boston MedFlight**
Adam Green - **Hawk Heli Services LLC**
Justin Marr - **Coulson Aviation Australia**
Richard Collie & Team - **North Carolina State Patrol**

To date, more than 1,100 E3 NVGs have been sold worldwide. Early adopters included operators in both North America and Europe.

“Some of the most rugged regions in Europe for flight are located near the mountainous terrain of the Alps,” said ASU Chief Pilot and Director of International Sales, Alex Emmel. “Having notable air rescue units and military organizations flying our E3 is an honor. We are thankful to see the E3 having a positive impact on their operations.”
