

PRESS RELEASE

Dallas, TX — March 7, 2026 – AMS Heli Design, a leading helicopter interior engineering and manufacturing company based in Dallas, TX, today announced a significant advancement in its EMS/MEDEVAC product portfolio, now featuring an **FAA-certified EMS/MEDEVAC kit for the Airbus H145 D2/D3** made available through a distributor agreement with Mecaer Aviation Group.

AMS Heli Design's kit delivers a lightweight, versatile design optimized for mission capability and operational efficiency. Developed with a focus on patient care and crew safety, the kit can be delivered within very few months from AMS's completion centers in Dallas, TX, and Philadelphia, PA.

The kit's modular design supports a wide range of missions, from full EMS to MEDEVAC to utility Quick Chance operations, offering operators flexibility and ease of use.

“This interior represents a new generation of EMS solutions, combining advanced ergonomics, cutting-edge technology, and weight-optimized design to improve both patient care and helicopter performance,” said **Andrea Girolin, CEO of AMS Heli Design**.

AMS Heli Design continues to deliver **customized solutions** that enhance safety, efficiency, and operational effectiveness for operators worldwide.

About AMS Heli Design
